

V-CAB SERIES

VERTICAL WALL MOUNT RACK ENCLOSURE

MAINFRAME's Vertical Wall Mount Rack Enclosure Series is a low profile enclosure that secures standard 19" rack equipment vertically, an ideal solution where floor space is limited. The top panel and doors lock for added security and the vented front cover provides air flow for heat dissipation. Constructed from heavy-duty steel, this cabinet ships fully assembled and is extremely easy to install.

Circular access ports on top and bottom of panel provides convenient cable management.

Door latch can be locked with a user-supplied padlock for extra security.
